REVIEW OF PERFORMANCE

The principal activities of the Group are:

- (i) production and sale of beverages (includes soft drinks & beer) and dairy products; and
- (ii) printing and publishing.

These activities are carried out through the Company's subsidiary, joint venture and associated companies to which the Company provides management and administrative services.

Profit Statement - 1st Quarter

Group revenue of \$488.7 million for the quarter ended 31 December 2015 decreased 11% as compared to the corresponding period last year due to lower contributions from Soft Drinks Malaysia and Dairies Malaysia.

Group PBIT (profit before interest and taxation) of \$53.9 million and attributable profit before exceptional items of \$25.5 million were 37% and 34% respectively higher than the corresponding period last year due to higher contributions from Dairies and Printing and Publishing operations.

Beverages

Overall Beverages revenue and PBIT were 19% lower as compared to the same period last year.

Revenue decreased by 19% compared to the corresponding period last year despite an increase in volume. Volume was boosted by the introduction of limited editions launched for the festive period - F&N Sparkling Drinks Pineapple flavoured and 100Plus festive gold cans. Despite the boost from volume, revenue was affected by the depreciation of the Malaysian Ringgit against the Singapore Dollar, competitive price pressures due to earlier commencement of Lunar New Year selling-in and the loss of Red Bull energy drink sales. Excluding sales of Red Bull in the previous year, revenue decreased 7%.

PBIT decreased by 19% mainly due to higher advertising and promotional expenses incurred to support expansion into new markets and to promote new products and higher operating costs incurred in new markets in Myanmar and Vietnam. This was partly offset by Soft Drinks Malaysia which reported an increase in PBIT as a result of improvements in raw and packaging material costs and timing of advertising and promotion spend.

Dairies

Dairies revenue was 9% lower than the corresponding period last year. Revenue in Dairies Malaysia and Dairies Singapore were affected by the depreciation of the Malaysian Ringgit against the Singapore Dollar and lower domestic and export sales. Sales were in turn impacted by lower production capacity as a result of a production line overhaul and tactical discounts given to narrow the price competition. Dairies Thailand recorded a slight growth in revenue in local currency which was negated by the depreciation of the Thailand Baht against the Singapore Dollar. The growth was backed by effective branding and consumer trade campaigns and increased distribution coverage.

Although revenue decreased, Dairies PBIT almost doubled to \$37.5 million mainly contributed by Dairies Thailand and Dairies Malaysia. The increase was mainly due to lower trade discounts extended, favourable commodity costs, recovery of withholding tax and continuing manufacturing efficiencies which were partially offset by a weaker MYR/THB exchange rate.

Printing and Publishing

Printing and Publishing revenue at \$84.3 million declined 5% from last year. Revenue gains in Publishing & Distribution were negated by Printing which was affected by lower print demand and negative translation impact from the depreciation of the Malaysian Ringgit. Distribution revenue increased due to higher partwork sales in Hong Kong and new distribution volume of magazines in Singapore. Export markets (non-United States of America) continue to do well for Publishing.

Profit before interest and taxation recovered from a loss of \$0.7 million and achieved a profit of \$2.5 million for the quarter ended 31 December 2015. This was mainly due to growth in revenue in the Distribution and Publishing businesses and from the benefit of a lower cost structure for Printing as a result of a restructuring exercise last year.

Tax

The low Group effective tax rate ("ETR") of 15.7% (31 December 2014: 20.5%) is reflective of the substantial increase in the tax exempt profits of overseas subsidiaries enjoying investment incentives. This was negated to some extent by non-deductible expenses and the non-recognition of deferred tax benefits on losses incurred.

Balance Sheet as at 31 December 2015

The Group

The increase in Reserves was mainly due to fair value gains of \$227.1 million on the investment in Vinamilk in Vietnam and profits of \$25.7 million retained for the period.

Non-current assets increased by \$224.4 million or 14% from \$1,577.5 million to \$1,801.9 million as at 31 December 2015 mainly due to:

- (i) fair value gains on the investment in Vinamilk; and
- (ii) increase in fixed assets due to additions partly offset by depreciation charges.

Current assets increased by \$79.9 million or 5% from \$1,565.4 million to \$1,645.3 million as at 31 December 2015 attributed mainly to:

- (i) an increase in cash and cash equivalents due to proceeds from bank borrowings and cash generated from operations; and
- (ii) an increase in trade receivables mainly due to stock up by retailers prior to the Lunar New Year and higher sales in Publishing and Distribution businesses.

Liabilities increased by \$30.8 million or 5% from \$586.8 million to \$617.6 million as at 31 December 2015 mainly due to an increase in borrowings as a result of a Thai Baht term loan facility taken up.

Group Cash Flow Statement for Quarter Ended 31 December 2015

The cash inflows and outflows are detailed in the Group Cash Flow Statement.

Net cash inflow from operating activities of \$24.1 million is lower as compared to \$44.3 million for the corresponding period last year mainly due to lower cash generated from operations as last year's results included Myanmar Brewery Limited, which had since been disposed in August 2015. This was partly offset by lower tax payments in the current quarter.

Net cash outflow from investing activities of \$12.0 million as compared to \$18.1 million last year was mainly due to the off-setting effect of proceeds received this quarter as a result of redemption of Other Investments.

Net cash inflow from financing activities of \$39.0 million was higher than \$6.0 million last year mainly due to the proceeds from the term loan facility taken up in Thailand.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

According to the IMF, global growth is projected at 3.4% in 2016, lower than the previous projection of 3.8%. While Asean economies are expected to grow above global average at 4.8%, Singapore is forecast to grow marginally better at 2.2%. Growth may face significant downside risk due to ongoing adjustments of the global economy, namely China's economic rebalancing, lower commodity prices, prospect of progressive increase in US interest rates and sudden bout of global risk aversion.

Consumer sentiment in the Food & Beverage segment is expected to be affected by both the economic climate and labour market. Consumer confidence in Singapore appears subdued on increased concerns about Singapore's economy in the near term while consumer confidence in Malaysia and Thailand are being challenged by slower economic growth and higher unemployment.

The operating environment for the Printing & Publishing segment is likely to remain challenging in the coming months. Education Publishing will continue to invest to strengthen its overseas markets while continuing efforts are made to introduce innovative and exciting online content and retail service concepts. Post restructuring of Printing in 2015, the focus remains on expansion of its commercial and non-traditional print jobs to mitigate the decline in traditional print business.

The Singapore Dollar is expected to remain relatively stronger against the regional Asia Pacific currencies and this may negatively impact the financial performance of the Group as a high proportion of earnings are derived from outside Singapore. The current favourable commodity prices will help mitigate some of the losses from currencies translation.

With \$700.0 million of cash available for business acquisitions and no net debt, the Group is well placed to actively pursue new business opportunities in 2016.
