REVIEW OF PERFORMANCE

The principal activities of the Group are:

- (i) production and sale of beverages (includes soft drinks, beer and stout) and dairy products; and
- (ii) printing and publishing.

These activities are carried out through the Company's subsidiary, joint venture and associated companies to which the Company provides management and administrative services.

Profit Statement – 2nd Quarter

Group revenue increased 3% to \$608 million for the quarter ended 31 March 2015 compared to the corresponding period last year. Beverages recorded higher revenue due to increased contribution from Beer operations while Dairies recorded higher revenue contribution from its operations in Thailand. Printing and Publishing revenue increased 2% to \$82 million.

Both Group PBIT (profit before interest and tax) of \$66 million and attributable profit before exceptional items of \$26 million were 24% and 33% lower than last year, mainly due to a one-off recognition of valuation gain on interest retained in a joint venture company following the demerger of FCL in the corresponding period last year.

Beverages

Overall Beverages revenue and PBIT was 5% and 10% higher compared to the same period last year.

Soft Drinks revenue decreased by 8% as compared to the corresponding period last year. Sales revenue in Malaysia was adversely affected by inventory destocking by the trade prior to the implementation of Goods and Services Tax. The adverse impact from the flood in the east coast of Peninsular Malaysia also contributed to the decrease in revenue. The decrease was partly mitigated by the expansion of soft drinks operations in export markets. PBIT decreased by 44% mainly due to lower sales volumes, higher freight costs and higher operating cost incurred for expansion in export markets.

Breweries revenue and sales volume were 27% and 21% higher than last year. Revenue and sales volume growth was mainly driven by *Myanmar Beer*, boosted by the forthcoming Water Festival in Myanmar. Breweries' PBIT increased by 40% mainly due to higher sales volume, lower energy cost and lower marketing spend. The increases were partly off-set by increased distribution costs resulting from expansion of its operations.

Dairies

Dairies revenue was 2% higher than the corresponding period last year.

Dairies Thailand recorded revenue increase of 11% on the back of volume growth in both domestic and export markets from increased outlet penetration and effective promotional and trade management activities. Dairies Malaysia revenue decreased 4% mainly due to higher discounts and unfavourable trade offers given to narrow price competition. Dairies Malaysia revenue was also adversely affected by the appreciation of the Singapore Dollar against the Malaysian Ringgit. Dairies Singapore recorded a 5% decrease in sales revenue mainly due to lower export sales.

Dairies PBIT increased 17% as compared to the corresponding period last year. Dairies Thailand PBIT increased 56% mainly due to favourable sales mix, higher factory utilization and improved operating efficiencies. However this was partly offset by increased maintenance expenses and timing of marketing spend.

Printing and Publishing

Printing and Publishing revenue increased 2% to \$82 million driven mainly by the publishing and distribution divisions. Publishing revenue increased due to higher sales from the USA and Latin America markets coupled with new orders from the UK. Increase in distribution revenue was mainly due to improved performance by the magazine distribution division. The increases were partly offset by the printing business which was affected by lower print volume and weaker sales from the retail business.

Loss before interest and taxation increased by \$1 million to \$2 million mainly due to lower sales in the printing business and cessation of equity accounting for the investment in Fung Choi Media Group Limited. This was partially offset by PBIT gains arising from strong profit contribution from the publishing business and lower overheads.

Others

The decrease is mainly due to a one-off recognition of valuation gain on interest retained in a joint venture company following the demerger of Frasers Centrepoint Limited ("FCL") in the corresponding period last year. No such gain was recognized in the current period.

Tax

The Group effective tax rate ("ETR") of 23.5% (2014: 21.7%) is higher than the corporate tax rate of 17% as a result of the high taxes imposed on the profits of overseas subsidiaries and non-deductible expenses. This was partly compensated by the write-back of over-provision in prior years. The ETR is higher than its comparative because of the one-off non-taxable gain last year and the increased profit contribution from subsidiaries operating in high tax countries in the current period.

Balance Sheet as at 31 March 2015

The Group

The increase in Reserves was mainly due to fair value gains on the investment in Vinamilk in Vietnam and profits of \$61 million retained for the period. This was partly offset by payment of dividends and negative currency translation.

The increase in Other Investments is mainly due to the fair value gains on the investment in Vinamilk. The increase in Inventories is mainly due to release of import quota in Thailand and destocking by retailers in Malaysia prior to implementation of GST in April 2015. Other Receivables increased mainly as a result of higher prepayments made by the Beverage Group while the decrease in Other Payables is mainly due to payments made for accruals outstanding as at 30 September 2014.

Group Cash Flow Statement for Quarter Ended 31 March 2015

The cash inflows and outflows are detailed in the Group Cash Flow Statement.

Net cash inflow from operating activities of \$42 million is higher than the \$14 million for the corresponding period last year mainly due to lower tax and interest payments made in the current quarter.

Net cash outflow from investing activities of \$23 million mainly relates to payments made for purchases of fixed assets while the cash outflow of \$710 million in the corresponding period last year mainly relates to the deconsolidation of FCL's cash balances upon the demerger of FCL.

Net cash outflow from financing activities was \$33 million as compared to an inflow of \$270 million last year, as last year's inflow arose from the settlement of loans from FCL upon the demerger partly offset by settlement of the corresponding bank loans and borrowings.

Group Profit Statement – 6 Months-to-Date

Group revenue increased 7% while PBIT decreased 1% to \$146 million as compared to the corresponding period last year. The higher revenue was mainly due to better performance from Beer which recorded higher revenue and volumes, and from Dairies Singapore and Dairies Thailand which recorded higher domestic revenue. Despite increases in Beer and Dairies Thailand PBIT, PBIT decreased slightly due to last year's one-off recognition of valuation gain on interest retained in a joint venture company upon the demerger of FCL. Group attributable profit before exceptional items and basic earnings per share before exceptional items were lower by 17% at \$61 million and 18% at 4.2 cents respectively.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

While global economic growth is expected to pick up modestly in 2015, the pace of recovery is likely to remain uneven across the economies. The Singapore economy is projected to grow at between 2% to 4% while key ASEAN economies like Malaysia, Indonesia and Vietnam are expected to remain resilient in 2015 and continue to grow faster than the global average rate.

Although global commodity prices continues to soften, this may be offset by weaker MYR and THB which may reduce the positive impact on F&B raw material costs. Consumer sentiments in Singapore appears to be subdued due to slower economic growth. The new Malaysian GST which took effect in April 2015 has negatively affected consumer sentiments in the short term. Thailand consumer sentiments appears to be fairly positive with continued political stability. Consumer sentiments in Vietnam is also looking more positive with lower interest rates, lower inflation and a more stable VND. While Myanmar beer sales volume will continue to see double digit growth, the Group's continued ownership of Myanmar Brewery remains uncertain.

The operating environment for the Printing & Publishing segment will remain challenging in the coming months. Education Publishing will continue to invest to strengthen its overseas markets and develop new markets while Printing will intensify restructuring of its cost structure to remain competitive and expand non-traditional print jobs to mitigate the decline in traditional print business.

While the relatively stronger Singapore Dollar against the regional Asia Pacific currencies will alleviate some pressure on import and raw material costs, it will also impact the financial performance of the Group as a high proportion of earnings are derived from outside Singapore.
